EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In paragraph [0001] in the specification, line 2, add "now abandoned," after "Application No. 09/783,242, filed on February 14, 2001,".

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The metal forming devices and die set of the claims which include an anti-friction bearing structure which comprises a bearing substrate and an anti-friction layer was not found to be anticipated by or obvious over the prior art references of record. The anti-friction layer is formed by sintering onto the bearing substrate a composition comprised of at least 2 wt.% of particules of a hardfacing composition, and the balance comprising bronze powder, a lead alloy powder, a tin powder or a tin alloy powder. The closest prior art reference appears to be Danly, Sr. (5,094,548), which discloses a composite and a self-lubricating bushing containing a bearing for use in die sets, presses and other heavy duty machinery. The bearing includes a sintered

layer of bronze powder, lead alloy powder, tin powder or tin alloy powder. The bearing of the claims differs by comprising at least 2 wt.% of particles of a hardfacing composition. Although hardfacing compositions are known as evidenced by Ecer (4,474,861), Ecer does not teach bearings for metal forming devices and die sets as required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

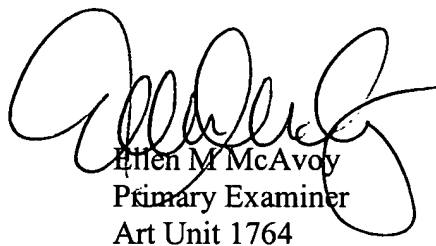

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ellen M. McAvoy whose telephone number is (571) 272-1451. The examiner can normally be reached on M-F (7:30-5:00) with alt. Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
